

Introducing Amara · Now available in the United Kingdom

It is not a legal chatbot. It is Amara at work across your whole firm.

A new generation of legal artificial intelligence that does more than answer. It knows your firm, organises the work and carries out complete tasks, in English.

133

features

4

levels of context: the whole firm

181,481

practising solicitors in England
and Wales

1

complete working environment

Amara works

Reads the matter, reasons about the case and delivers complete work for the lawyer to review

LexHub and LexCRM organise

CRM, matters, documents and team

Amara Work carries it out

Give it a task and it prepares it in full inside the matter

A chatbot answers.

Amara works, knows your firm, organises and delivers.

Most legal AI tools stop at the conversation. Amara starts from a different idea: lawyers do not only need answers, they need an environment where the work moves forward, the client is kept informed and the firm stays organised.

Legal chatbot	Amara Legal
Answers one-off questions	Takes on tasks and works inside the matter
Does not know the case	Reads the documents and knows the client and the communications on the matter
The work ends in a block of text	Carries on into tasks, timeline, team and documents
Does not talk to the client	Automatic WhatsApp message to the client in under a minute, and documents that land in the matter
Cites whatever seems right	What cannot be verified is not cited: official sources and a check on every reference

+100

features in a single environment: legal intelligence, documents, matters, CRM, case assessment, client communication, team and networks of firms.

A platform that brings together legal AI with verifiable references, CRM and matters, and Amara Work, for solicitors, barristers and law firms in the UK.

Neurogestión SL, October 2026.

Amara analyses. LexHub organises. Amara Work delivers. And the lawyer decides.

Layers that work together. Every new case, every uploaded document and every conversation with the client feeds the same matter.

--	---	---	--	---

This is Amara inside the application.

A single entry point for legal work: choose how you want to work and Amara carries it out with the context of your firm.

Illustrative recreation of the application with fictitious data.

1

Three modes on one screen

Amara for legal conversation, Amara Advanced for precision on complex cases and Amara Work, an agent that works the case and gets it ready.

2

Your matters to hand

Matters, recent conversations and search. "Add matter" creates the matter and, from that moment on, Amara knows its documents and its history.

3

Type, attach or dictate

Tell it what you are working on, upload documents or use the microphone. Amara understands the context of the case before helping you.

Ask for a guided demo

We will show you Amara and LexHub at work, or you can start now with a 30-day trial by signing up with your email at amaralegal.ai/en.

Amara lives inside the matter.

No longer a chatbot: it is the firm's tool.

Inside every matter there are tabs for Amara, Amara Advanced and Amara Work. The lawyer works with the AI without leaving the case, with the documents, the client and the history in front of them.

The screenshot shows a legal matter interface for a 'Fictitious client' in 'Employment · Dismissal'. The interface includes a top navigation bar with 'Send by WhatsApp', 'Send by email', and 'Request documents' buttons. Below the navigation bar, there are tabs for 'Summary', 'Amara', 'Documents', 'Notes and follow-up', 'Tasks', 'Amara Advanced' (selected), 'Amara Work', and 'Drafts'. The 'Amara Advanced' tab is active, displaying a 'Legal assistant' section with options like 'Talk to Amara Advanced' and 'In-depth legal reasoning'. The main content area shows a conversation with Amara, starting with 'Amara remembers the context, documents and actions on this matter' and 'Employment law'. The conversation includes a prompt to 'Review the dismissal letter and the payslips. Is the dismissal unfair? What time limits do we have?' and a response from Amara providing an 'Initial review of the matter' with three points: 1. The dismissal letter does not set out in detail the specific facts relied on against the employee. 2. Length of service taken from the contract and payslips: 4 years and 3 months. 3. Points to confirm against the legislation in force before fixing any time limit or compensation figure. Below the response, there are tags for 'Unfair dismissal' and 'Matter documents: 3 of 3'. At the bottom, a status bar indicates 'Amara has read the documents on the matter · The lawyer reviews and decides.'

Illustrative recreation of the Amara Advanced tab inside a matter, with a fictitious case and client. Amara and Amara Work sit in the same matter.

IF YOU WANT A LEGAL CONVERSATION

Amara

Quick queries and conversation with the context of the case.

IF YOU NEED PRECISION AND POWER

Amara Advanced

For complex cases: in-depth analysis, advanced reasoning and work saved to the matter.

IF YOU WANT AN AGENT THAT WORKS

Amara Work

Works the case for you, gets it ready, and the lawyer reviews and decides.

Four ways to work with Amara.

Each one handles a different kind of work, and all of them operate inside the matter and with the documents the firm authorises.

QUERY

Amara

Legal chat for quick queries

Case analysis and legal risks

Documents needed and initial strategy

Review of pleadings and analysis of judgments

Counter-strategy

Drafts: client letter, letter before claim, request for documents

INSIDE THE MATTER

Amara in the matter

The copilot in every matter

Knows the facts, the documents and what has already been done

Works with the permanent context of the case

Checks the communications on the matter and with the client

REASONING

Amara Advanced

For complex cases

Strategy and counter-strategy

Prospects of success and negotiation

Litigation risks and inconsistencies

Chronology and document analysis

Review of pleadings and hearing preparation

DELEGATED WORK

Amara Work

Works for you

Takes a task, not a question

Full diagnosis: routes, jurisdiction, requirements, time limits, risks and evidence

Document list and comparison of options

Initial strategy and next step

Shows which documents it read and which it did not

Documents that become context

Reads PDF, images, Word, Excel and emails, with optical character recognition for scanned documents.

Dictation and transcription

The lawyer dictates the task or transcribes recordings and receives a summary inside the matter.

Draft preparation

Letter before claim, particulars of claim, application to a public body and client letter, always as a reviewable draft.

Firm library

Every document from every matter, organised and reusable by the team.

From the task to a result you can review.

Amara Work does not wait for a question: it takes a task inside the matter and moves forward in stages. When information is missing, it does not make it up: it flags it and asks for it.

- | | | | |
|---|--|--|---|
| 01
You hand over the work
"Review this matter", "identify the risks before we respond", "prepare the initial strategy". | 02
It understands the context
Checks the matter, the documents, the client and the communications on the case. | 03
It researches and asks
Identifies sources, requirements and time limits. If relevant information is missing, it shows it. | 04
It delivers reviewable work
Diagnosis, document list or strategy, saved to the matter. |

Amara works. The lawyer decides.

Amara's outputs are proposed work. Review, signature and the professional decision always rest with the lawyer.

Amara Legal · Dossier · United Kingdom

7

Frontier models, as soon as they are released.

Lawyers using Amara Advanced or Amara Work work with frontier AI models. We do not pick the cheapest model: we pick by quality on legal work, and we give up part of our commercial margin to offer it.

OPENAI

GPT-6

Astra Sol Luna

OpenAI's family of advanced models, for in-depth reasoning and long pieces of work.

ANTHROPIC

Claude

Sonnet Fable

Anthropic's models, known for understanding long documents and for drafting.

FOR YOUR FIRM

Always the latest

When a better model comes out, Amara integrates it. The lawyer does nothing: they simply work with the latest model available.

HOW WE DO IT

1. A new model comes out

We follow OpenAI and Anthropic from day one of each release.

2. We evaluate it

We test it on real legal work, not on generic benchmarks.

3. We integrate it in days

We adapt quickly, without waiting for long cycles.

4. You start using it

No data migration and no change to the way you work.

The model first. The margin second.

We aim for a balanced price, but what matters most to us is the lawyer's peace of mind: their matters are always handled with frontier models. Cutting model costs is a legitimate commercial decision; we have decided otherwise.

Several providers

It does not depend on a single AI vendor: we use the strengths of each.

The lawyer decides

Every output is proposed work that the lawyer reviews and signs.

UK law, England and Wales first.

Every provision with its official source. Coming soon.

Amara does not answer from the model's memory alone: it first searches a legal corpus, cites the section and the provision, and checks that the reference exists and is in force. That is how it works today in Spain, with almost 3 million legal units, and that is how we are building the UK corpus.

THE SOURCES (IN PROGRESS)

- **legislation.gov.uk**
The National Archives: revised versions and point-in-time legislation
- **Find Case Law**
The National Archives: judgments from 2001 onwards
- **The UK Supreme Court**
Judgments of the highest appellate court in the UK
- **Assimilated law**
Former retained EU law, renamed from 1 January 2024
- **HUDOC**
European Court of Human Rights, in a separate collection

FIRST PHASE (IN PREPARATION)

- England and Wales as the first jurisdiction
- Primary legislation in its revised versions
- Secondary legislation linked to its parent Act
- Judgments of the higher courts, from Find Case Law
- Assimilated law, with its history since 2024
- Human Rights Act 1998 and Strasbourg case law
- Scotland and Northern Ireland kept as separate jurisdictions

The version in force on the date of the facts

Each provision with its official reference, dates of enactment and commencement, and point-in-time versions. Anything that cannot be verified is flagged for review.

Assimilated law, traced

Each assimilated provision is linked to its origin as retained EU law and to the changes made under the Retained EU Law (Revocation and Reform) Act 2023.

No mixing of jurisdictions

Each country has its own corpus. Amara identifies the jurisdiction of each matter, England and Wales, Scotland or Northern Ireland, before searching.

COMING SOON

Amara's result on UK professional exam questions

In Spain, Amara answered 99 out of 100 questions correctly in the judicial and public prosecution entrance exam (CGPJ, 2025 call). Amara's result on UK professional exam questions, with the full methodology: coming soon.

Your matters are yours.

Security and compliance by design.

It is the first question firms ask: where the data is, who can see it and whether it feeds the AI. These are Amara's answers.

§

UK GDPR and the Data Protection Act 2018

Amara acts as processor, under a data processing agreement, and the firm is the controller.

EU

Servers in Europe

Database and files in Paris (France), automations in Nuremberg (Germany), website and email in Madrid.

x

Your data does not train the AI

The firm's matters and documents are never used to train models.

●

Pseudonymisation and anonymisation

Before adding a document to the library or sharing it, you choose to pseudonymise it or remove the data irreversibly.

●

Confidentiality and access

Each lawyer has their own account and the firm decides who sees each matter, with permissions by office, team and user enforced on the server.

■

Encryption and security scanning

Mandatory encrypted connections, an encrypted database and an automatic security scan before each version is released.

ISO/IEC 27001

In progress

We are working towards ISO/IEC 27001 certification, the international standard for information security, and we do not present it as obtained. And one ground rule: Amara works, but nothing leaves the matter without the lawyer's review.

Client confidentiality and privilege

The starting point (SRA Code of Conduct): client confidentiality and legal professional privilege. Amara prepares and proposes; the lawyer reviews and decides.

Report a security issue

seguridad@amaralegal.ai · amaralegal.ai/well-known/security.txt

The firm's work, connected.

LexHub is the management environment where matters live: files, documents, clients, tasks and team. Amara works on top of all of it, so the AI always has the full context.

Amara Work

Case summary

Key details: channel: WhatsApp · the client specifically asks for a lawyer

Client's request: challenge the dismissal and claim compensation

Main facts: written dismissal with no specific facts given, 4 years and 3 months' service

Urgency and time limits: confirm the time limit for bringing the claim

Matter record

Area	Employment
Status	Ongoing
City	Manchester
Opened	2 Oct 2026

Illustrative recreation of a matter record in LexHub with fictitious data.

Matters on a board and a full record

Customisable statuses, timeline, activity history and an AI-written case summary.

Tasks and next action

Each matter with its tasks and next step, with alerts for stalled matters.

Notes and follow-up

Notes, follow-up and activity history kept on the same matter record.

Documents and library

Optical character recognition, reading of PDF, Word, Excel and images, data extraction and a central firm repository.

Team, offices and organisation chart

Invitations, roles, multiple offices and matters shared between professionals or firms.

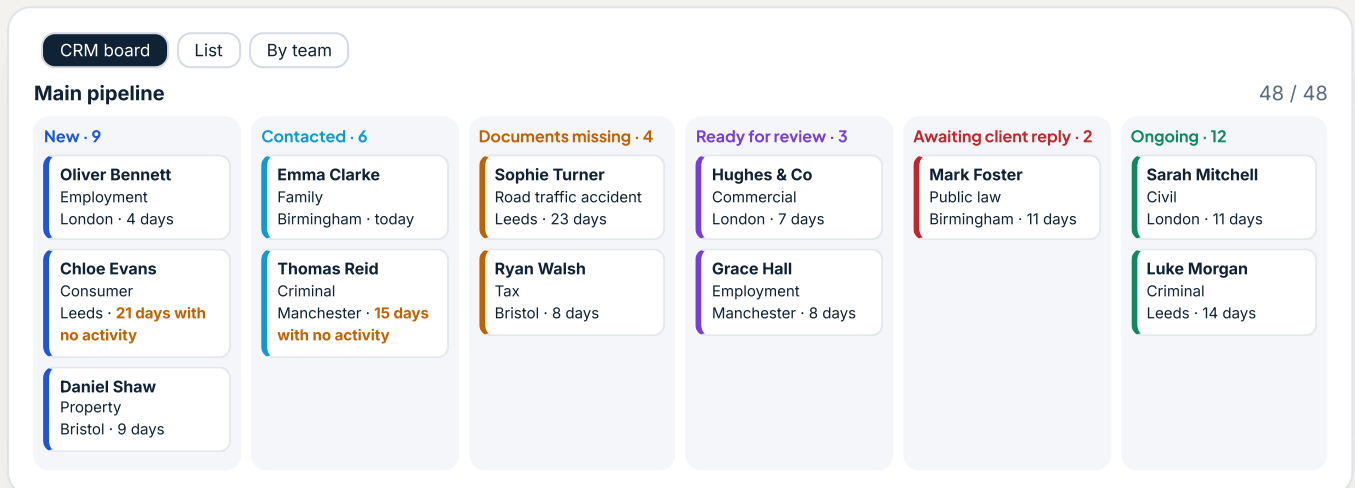

Permanent case memory

Decisions taken on the matter are kept as memory for the next queries to Amara.

LexCRM.

Your firm's CRM.

Every enquiry, every matter and every client in one place, from first contact to closing the matter. A CRM designed for lawyers, with Amara working on top: it reads the documents, summarises the case and proposes the next step. €9.99/month + VAT, with the first 3 months free.

Illustrative recreation of the CRM board with fictitious data. Pipeline stages are customisable and cards can be dragged between columns.

Visual pipeline and three views

Board, list and team view, with advanced filters.

Stalled matter alerts

Each card shows the days with no activity and flags the urgent ones.

Assessment of every enquiry

Each opportunity assessed so you know where to start.

Full record for every matter

Timeline, tasks, documents and client communication.

Client communication

Automatic WhatsApp in under a minute and a client portal by link.

Team, offices and referrals

Roles, multiple offices, shared matters and referrals between firms.

The client is kept informed from the very first minute.

When the client's matter is opened, they receive a WhatsApp message from an official number in under a minute, confirming that their case is in a lawyer's hands. If they reply or send documents, everything lands in the matter record.

01 The client arrives Describes their situation by phone, website or WhatsApp.	02 The matter is created Summarised, organised and ready to work on.	03 WhatsApp in under a minute Automatic notice from the official number.	04 Everything in the matter Replies and documents reach the lawyer's record.
--	--	--	--

Link

Client portal. Send the client a link and, from it, they upload their documents and view a portal with all the information on their case. Everything they upload reaches the matter.

WhatsApp tab in the matter

The conversation by day, downloadable attachments and an unread message counter.

Document generator

Letter before claim, particulars of claim and client letter, straight from the matter.

Dictation and transcription

The lawyer dictates the task or transcribes recordings and receives a summary in the matter.

OCR and document reading

Scanned documents of up to 1,000 pages, PDF, Word, Excel, images and emails.

INTEGRATIONS

WhatsApp with an official number per matter · **Microsoft Word** to use Amara inside your documents · **Under study:** HMCTS online services (CE-File and the online civil money claims service), to follow from Amara the cases and deadlines a firm manages in HMCTS services.

A single provider for the whole legal career.

Amara supports legal professionals at every stage: at university, when starting out in practice, as an independent lawyer and as a firm with several offices.

STAGE 1

University

Law students work with a real tool, the same one lawyers use.

The university's own portal with accounts for lecturers and students

Simulated cases and real anonymised cases

Lecturers follow each student's work

Free of charge in 2026-2027

STAGE 2

Trainee and newly qualified lawyer

AI, practice management software and clients from day one.

CRM and matters included

Special terms for newly qualified lawyers

Support when getting started

STAGE 3

Independent lawyer

All legal work in one environment, without leaving it.

Amara, Advanced and Work

LexCRM, matters and WhatsApp

€69/month + VAT (€49 the first month)

Amara Solo

STAGE 4

Large firm

Personalised AI for the whole group, by role.

Tailored environment by office, team and user

Management sees what each team is doing

Shared library and matters

Support during implementation

Amara Multi-office · on request

From first year to large firm

The student who learns with Amara at university keeps using it to practise for the SQE with real matters, and takes it along as their firm grows. The same environment and the same way of working, with more tools at each stage.

WHAT SETS AMARA APART

More productivity

Amara works on the matters: it does more than answer, it delivers complete work.

Easy to use

A simple environment, nothing to install and support from day one.

All in one environment

AI, matters, CRM and WhatsApp.

In English

Drafting in English today; UK legal corpus linked, coming soon.

Amara is no longer a chatbot. It is your legal assistant in your pocket.

Android and iOS

Phone and tablet

Amara for you

For the public. Take a photo, explain what happened and Amara organises the matter.

Amara · your legal assistant

I've had a car accident. These are the details we exchanged.

I've read them. Two vehicles were involved and both drivers' details are included.

Road traffic accident

You may have a claim

The case is ready for your lawyer.

Amara for professionals

Case ready

Summarised and organised

Your lawyer

The right one, recommended

Others stop at the conversation.
Amara closes the whole loop.

Proven work. No experiments.

If your firm uses other tools, you need to know that Amara is not a gamble. There are firms using all of its features day to day, and the platform improves every day.

Illustrative recreation of the organisation chart of a firm with several offices, teams and roles. Fictitious data.

IN PRODUCTION

Firms working with Amara

Every feature in real use every day, on real matters for real firms in Spain.

CONTINUOUS IMPROVEMENT

We improve every day

New features and constant improvements, without the team having to stop work.

IMPLEMENTATION

Full support

We set up offices, teams and roles and migrate your matters into the environment.

CONTROL

Management sees what is happening

Organisation chart, roles and permissions by office, team and user.

SECURITY

Servers in Europe

Your data does not train the AI. ISO/IEC 27001 in progress.

TECHNOLOGY

Frontier models only

Frontier models, even when they cost more. And we adapt to each release within days.

For one lawyer. And for an entire network.

The same platform grows from a sole practitioner to an organisation with several offices. And Amara can be configured as a dedicated environment, with each organisation's brand, matters and workflows.

Offices and organisation chart

- Offices, heads and members per firm
- Network organisation chart
- Invitations and roles
- CRM by office, lawyer and status
- Shared matters and referrals between firms

Custom areas

- Environments by type of case and specialism
- Area builder with a set-up wizard
- Case intake linked to the portal
- Each area's own library and knowledge
- The organisation's own AI environment

Shared knowledge

- Knowledge repository with review and approval
- Templates for pleadings and applications by type of case
- Each firm contributes whatever it chooses
- Pseudonymisation or anonymisation before sharing

Governance and control

- Data kept separate for each firm
- Access log for every matter
- AI usage control per firm
- Daily backups
- Subscriptions and prepaid AI balance per organisation

A tool that grows with the firm: from the first matter to a network of firms.

Environments with several offices and areas are configured to order.

Your hyper-specialised assistant. Amara, specialised in what you need.

When a lawyer needs a specialised assistant, Amara is configured as a specialist lawyer. Tell us what you need and we will turn Amara into your hyper-specialised assistant.

Tailored instructions and working environments

We create the instructions and custom working environments so that the lawyer has the assistant they want, in the specialism they need: employment, family, commercial, criminal, property or whatever your firm requires.

SOME AGENTS YOU CAN ASK FOR

Intake agent

Classifies incoming enquiries, identifies urgency and prepares a first reply.

Matter agent

Summarises the case and identifies missing documents, milestones, risks and next steps.

Document agent

Reviews contracts, pleadings, letters before claim, deeds and client documents.

Deadlines agent

Keeps track of time limits, tasks, owners and the week's priorities.

Client agent

Prepares clear updates for the client on the status of their case.

Specialism agent

Adapted to employment, commercial, family, criminal, immigration, banking, public law and more.

Management agent

An overall view of workload, open matters, bottlenecks and opportunities.

Legal marketing agent

Turns frequently asked questions and legal updates into content for the website and the newsletter.

HOW IT WORKS

- 01 Tell us the process**
 The problem or task you want to solve.
- 02 We analyse**
 Data, permissions, documents and tools.
- 03 We design**
 The agent and its limits.
- 04 We test**
 With real or simulated cases.
- 05 We fine-tune**
 Before building it into the firm's workflow.

Getting started is easy. And we are with you.

You do not need technical knowledge or weeks of set-up. We help you prepare the environment for work: your firm, your team and your matters.

1. Sign-up

We create your account and verify your professional status.

2. We set up your firm

Firm details, offices, team, invitations and your specialisms.

3. We migrate your work

We upload your first matters and documents and create matters directly from a pleading or a document.

4. First matter with Amara

Together we try Amara, Advanced and Work on a real matter and define the right custom agent for you.

WHAT WE DO

Set up the environment, answer your questions, prepare your templates and agents and support you on your first matters.

WHAT YOU DO

Tell us how you work and try it on a real matter, with a 30-day trial by signing up with your email.
