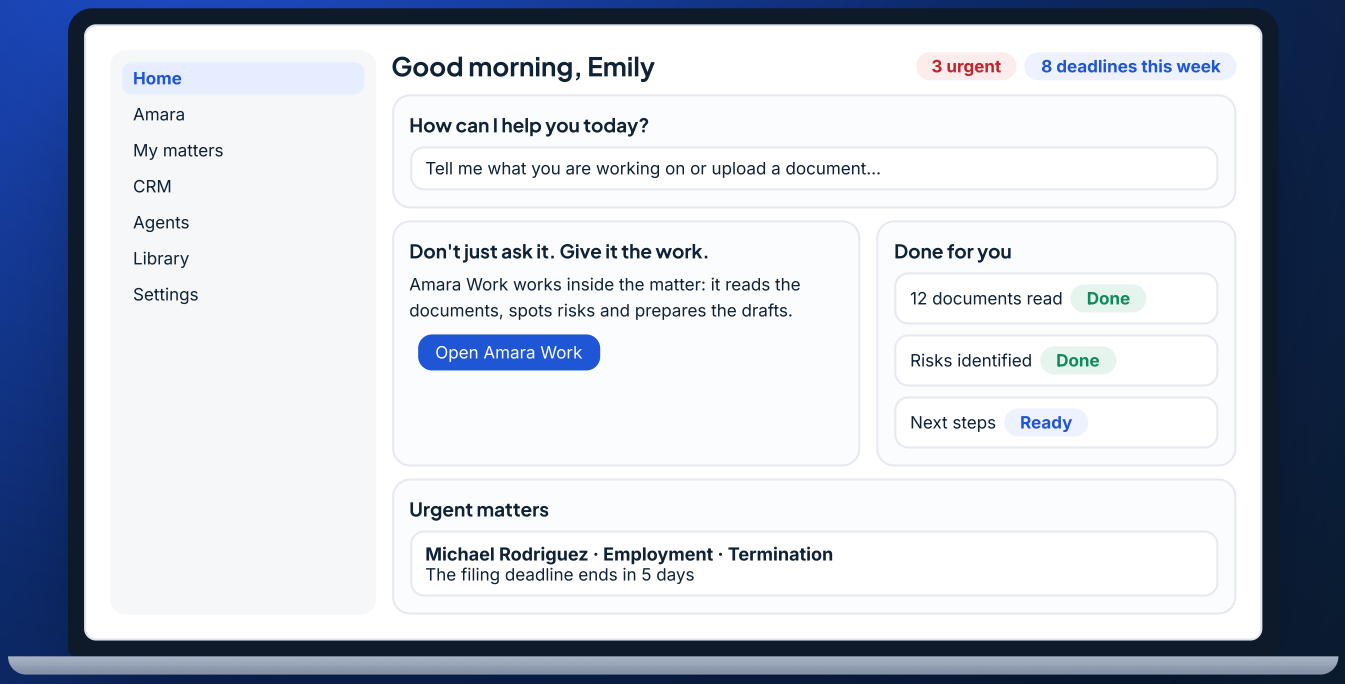
Introducing Amara · Now available in the United States

It is not a legal chatbot. It is Amara at work across your whole firm.

A new generation of legal artificial intelligence that does more than answer. It knows your firm, organizes the work and carries out complete tasks, in English.



133 features

4 levels of context: the whole firm

1,374,720 active resident attorneys in the US (ABA, 2025)

1 complete working environment

Amara works
Reads the matter, reasons about the case and delivers complete work for the attorney to review

LexHub and LexCRM organize
CRM, matters, documents and team

Amara Work carries it out
Give it a task and it prepares it in full inside the matter

01 · THE IDEA

01

A chatbot answers. Amara works, knows your firm, organizes and delivers.

Most legal AI tools stop at the conversation. Amara starts from a different idea: attorneys do not only need answers, they need an environment where the work moves forward, the client is kept informed and the firm stays organized.

Legal chatbot	Amara Legal
Answers one-off questions	**Takes on tasks and works inside the matter**
Does not know the case	**Reads the documents and knows the client and the communications on the matter**
The work ends in a block of text	**Carries on into tasks, timeline, team and documents**
Does not talk to the client	**Automatic WhatsApp message to the client in under a minute, and documents that land in the matter**
Cites whatever seems right	**What cannot be verified is not cited: official sources and a check on every reference**

+100 **features in a single environment:** legal intelligence, documents, matters, CRM, case assessment, client communication, team and networks of firms.

A platform that brings together legal AI with verifiable references, CRM and matters, and Amara Work, for attorneys and law firms in the United States.

Neurogestión SL, October 2026.

02 · THE PLATFORM

02

Amara analyzes. LexHub organizes. Amara Work delivers. And the attorney decides.

Layers that work together. Every new case, every uploaded document and every conversation with the client feeds the same matter.

AMARA

Analyzes

- Legal conversation with the context of the case
- Amara Advanced: in-depth reasoning
- Corpus with verifiable references
- Citation checking

LEXHUB

Organizes

- LexCRM: client management
- Matters on a board and a full record
- Tasks, timeline and summary
- Matter documents and library
- Team and offices

AMARA WORK

Delivers

- Takes a task, not a question
- Reads the documents on the matter
- Prepares pleadings, motions and letters
- Saves the work to the matter

YOU

Decide

- Every output is a draft you can review
- Documents read and missing in plain view
- No guessing: gaps are flagged
- Reviewing, signing and deciding is for the attorney

THE US IN NUMBERS · AMERICAN BAR ASSOCIATION AND NCSC

1,374,720
active resident attorneys in the US (ABA National Lawyer Population Survey, 2025)

190,015
active resident attorneys in New York (ABA, 2025)

181,048
active resident attorneys in California (ABA, 2025)

~70M
cases filed in state courts in 2024 (National Center for State Courts)

THE JOURNEY OF A CASE

01
The client arrives
By phone, website, WhatsApp or email.

02
Amara understands
Puts the facts in order and identifies the practice area.

03
The matter opens
With documents, summary and deadlines.

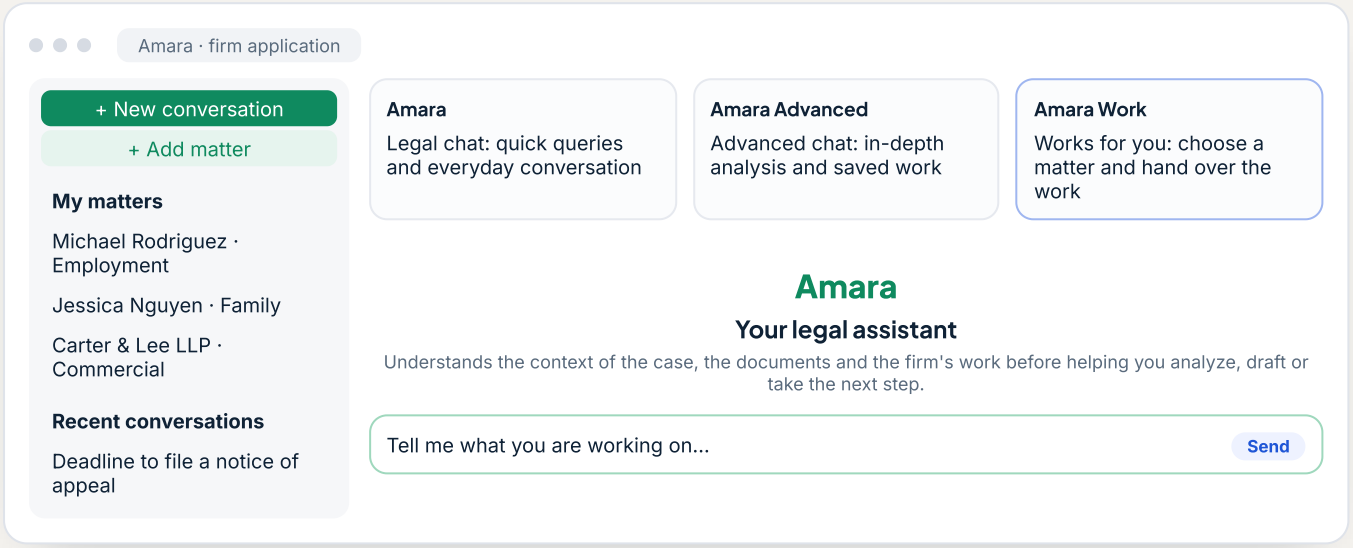
04
Amara Work prepares
Pleadings, letters and next steps.

05
The firm works
And the attorney reviews, signs and decides.

03

This is Amara inside the application.

A single entry point for legal work: choose how you want to work and Amara carries it out with the context of your firm.



Illustrative recreation of the application with fictitious data.

1

Three modes on one screen

Amara for legal conversation, Amara Advanced for precision on complex cases and Amara Work, an agent that works the case and gets it ready.

2

Your matters at hand

Matters, recent conversations and search. "Add matter" creates the matter and, from that moment on, Amara knows its documents and its history.

3

Type, attach or dictate

Tell it what you are working on, upload documents or use the microphone. Amara understands the context of the case before helping you.

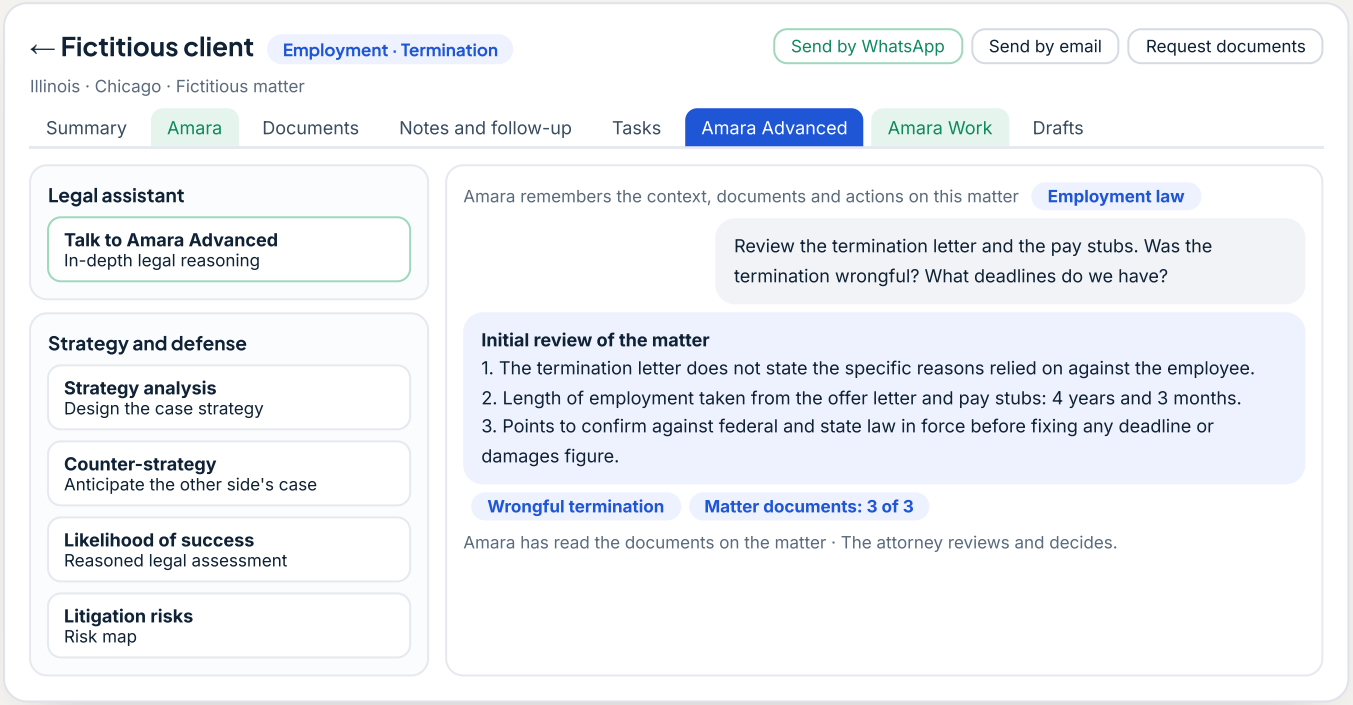
Ask for a guided demo

We will show you Amara and LexHub at work, or you can start now with a 30-day trial by signing up with your email at amaralegal.ai/en-us.

04

Amara lives inside the matter.
No longer a chatbot: it is the firm's tool.

Inside every matter there are tabs for Amara, Amara Advanced and Amara Work. The attorney works with the AI without leaving the case, with the documents, the client and the history in front of them.



Illustrative recreation of the Amara Advanced tab inside a matter, with a fictitious case and client. Amara and Amara Work sit in the same matter.

IF YOU WANT A LEGAL CONVERSATION

Amara

Quick queries and conversation with the context of the case.

IF YOU NEED PRECISION AND POWER

Amara Advanced

For complex cases: in-depth analysis, advanced reasoning and work saved to the matter.

IF YOU WANT AN AGENT THAT WORKS

Amara Work

Works the case for you, gets it ready, and the attorney reviews and decides.

05

Four ways to work with Amara.

Each one handles a different kind of work, and all of them operate inside the matter and with the documents the firm authorizes.

QUERY

Amara

Legal chat for quick queries

- Case analysis and legal risks
- Documents needed and initial strategy
- Review of pleadings and analysis of opinions
- Counter-strategy
- Drafts: client letter, demand letter, document request

INSIDE THE MATTER

Amara in the matter

The copilot in every matter

- Knows the facts, the documents and what has already been done
- Works with the permanent context of the case
- Checks the communications on the matter and with the client

REASONING

Amara Advanced

For complex cases

- Strategy and counter-strategy
- Likelihood of success and negotiation
- Litigation risks and inconsistencies
- Chronology and document analysis
- Review of briefs and hearing preparation

DELEGATED WORK

Amara Work

Works for you

- Takes a task, not a question
- Full diagnosis: options, jurisdiction, requirements, deadlines, risks and evidence
- Document list and comparison of options
- Initial strategy and next step
- Shows which documents it read and which it did not

Documents that become context

Reads PDF, images, Word, Excel and emails, with optical character recognition for scanned documents.

Draft preparation

Demand letter, complaint, motion, letter to a government agency and client letter, always as a reviewable draft.

Dictation and transcription

The attorney dictates the task or transcribes recordings and receives a summary inside the matter.

Firm library

Every document from every matter, organized and reusable by the team.

06

From the task to a result you can review.

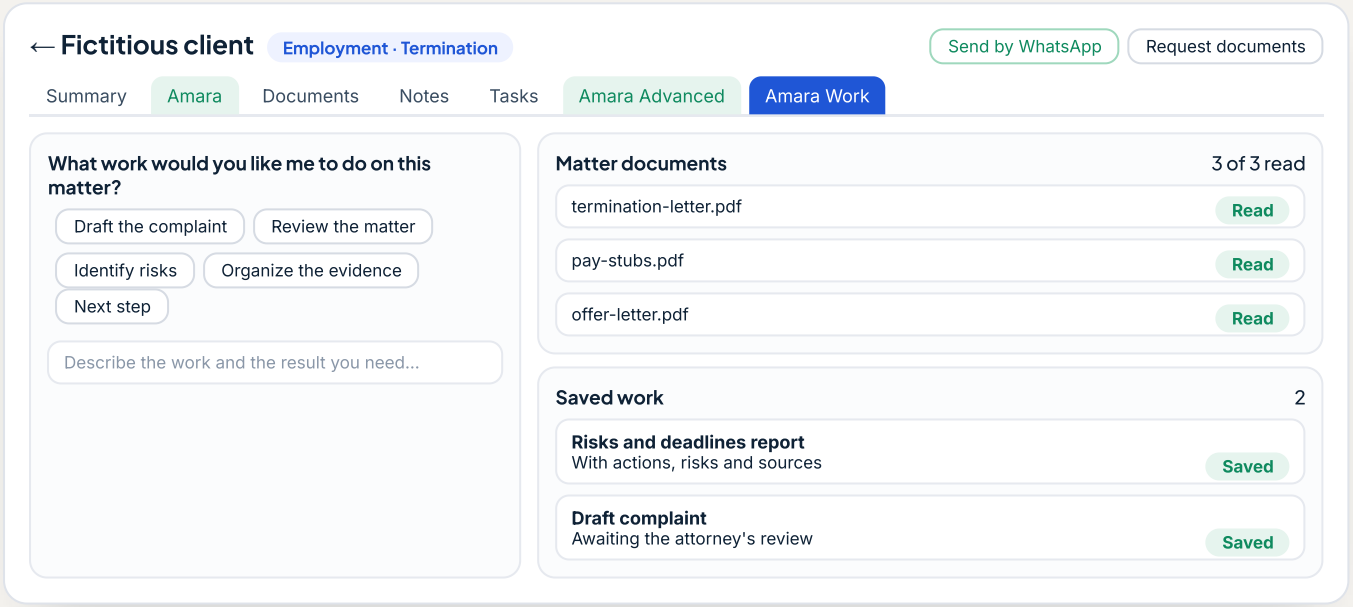
Amara Work does not wait for a question: it takes a task inside the matter and moves forward in stages. When information is missing, it does not make it up: it flags it and asks for it.

01
You hand over the work
"Review this matter", "identify the risks before we respond", "prepare the initial strategy".

02
It understands the context
Checks the matter, the documents, the client and the communications on the case.

03
It researches and asks
Identifies sources, requirements and deadlines. If relevant information is missing, it shows it.

04
It delivers reviewable work
Diagnosis, document list or strategy, saved to the matter.



Illustrative recreation of the Amara Work tab inside a matter, with fictitious data.

Amara works. The attorney decides.

Amara's outputs are proposed work. Review, signature and the professional decision always rest with the attorney.

07 · AI MODELS

Frontier models, as soon as they are released.

Attorneys using Amara Advanced or Amara Work work with frontier AI models. We do not pick the cheapest model: we pick by quality on legal work, and we give up part of our commercial margin to offer it.

OPENAI

GPT-6

Astra · Sol · Luna

OpenAI's family of advanced models, for in-depth reasoning and long pieces of work.

ANTHROPIC

Claude

Sonnet · Fable

Anthropic's models, known for understanding long documents and for drafting.

FOR YOUR FIRM

Always the latest

When a better model comes out, Amara integrates it. The attorney does nothing: they simply work with the latest model available.

HOW WE DO IT

1. A new model comes out
We follow OpenAI and Anthropic from day one of each release.

2. We evaluate it
We test it on real legal work, not on generic benchmarks.

3. We integrate it in days
We adapt quickly, without waiting for long cycles.

4. You start using it
No data migration and no change to the way you work.

The model first. The margin second.

We aim for a balanced price, but what matters most to us is the attorney's peace of mind: their matters are always handled with frontier models. Cutting model costs is a legitimate business decision; we have decided otherwise.

Several providers
It does not depend on a single AI vendor: we use the strengths of each.

The attorney decides
Every output is proposed work that the attorney reviews and signs.

08 · LEGAL SOURCES

US law, federal law first. Every provision with its official source. Coming soon.

Amara does not answer from the model's memory alone: it first searches a legal corpus, cites the section and the provision, and checks that the reference exists and is in force. That is how it works today in Spain, with almost 3 million legal units, and that is how we are building the US corpus.

THE SOURCES (IN PROGRESS)

- **U.S. Code, GovInfo and Congress.gov**
  Office of the Law Revision Counsel: the 54 titles of the U.S. Code
- **eCFR and the Federal Register**
  The 50 titles of the Code of Federal Regulations, and rulemaking
- **Supreme Court and CourtListener**
  Opinions of the Supreme Court and federal courts (Free Law Project)
- **Caselaw Access Project**
  Harvard Law School: more than 6.7 million published cases
- **State legislatures and courts**
  Statutes and opinions, state by state, in separate collections

ROLLOUT (IN PREPARATION)

- Federal law as the first phase
- Statutes in force, linked to their regulations
- Federal opinions, from official and open sources
- Then California (181,048 attorneys), Texas (99,867) and Florida (80,976)
- Then New York (190,015 attorneys, ABA 2025)
- Every state kept as a separate jurisdiction
- Federal and state courts never mixed

The version in force on the date of the facts

Each provision with its official citation, dates of enactment and effective date, and historical versions. Anything that cannot be verified is flagged for review.

Binding or persuasive, classified

Amara will classify authority as binding or persuasive for the court and flag subsequent history for the attorney to check. It is not a citator.

No mixing of jurisdictions

Federal law and each state have their own corpus. Amara identifies the jurisdiction and the court of each matter before searching.

COMING SOON

Amara's result on US bar exam questions

In Spain, Amara answered 99 out of 100 questions correctly in the judicial and public prosecution entrance exam (CGPJ, 2025 call). Amara's result on US bar exam questions, with the full methodology: coming soon.

09

Your matters are yours.
Security and compliance by design.

It is the first question firms ask: where the data is, who can see it and whether it feeds the AI. These are Amara's answers.

§

Data processing agreement

Amara acts as processor and service provider under a data processing agreement, and the firm keeps control of its data.

EU

Data in the EU today

Database and files in Paris (France), encrypted. US data hosting for US firms: in preparation.

×

Your data does not train the AI

The firm's matters and documents are never used to train models.

◐

Pseudonymization and anonymization

Before adding a document to the library or sharing it, you choose to pseudonymize it or remove the data irreversibly.

◉

Confidentiality and access

Each attorney has their own account and the firm decides who sees each matter, with permissions by office, team and user enforced on the server.

▣

Encryption and security scanning

Mandatory encrypted connections, an encrypted database and an automatic security scan before each version is released.

ISO/IEC 27001

In progress

We are working toward ISO/IEC 27001 certification, the international standard for information security, and we do not present it as obtained. And one ground rule: Amara works, but nothing leaves the matter without the attorney's review.

Attorney-client privilege and confidentiality

The starting point, in line with ABA Formal Opinion 512 (July 2024) on generative AI: competence, confidentiality and supervision. Amara proposes; the attorney reviews, signs and decides.

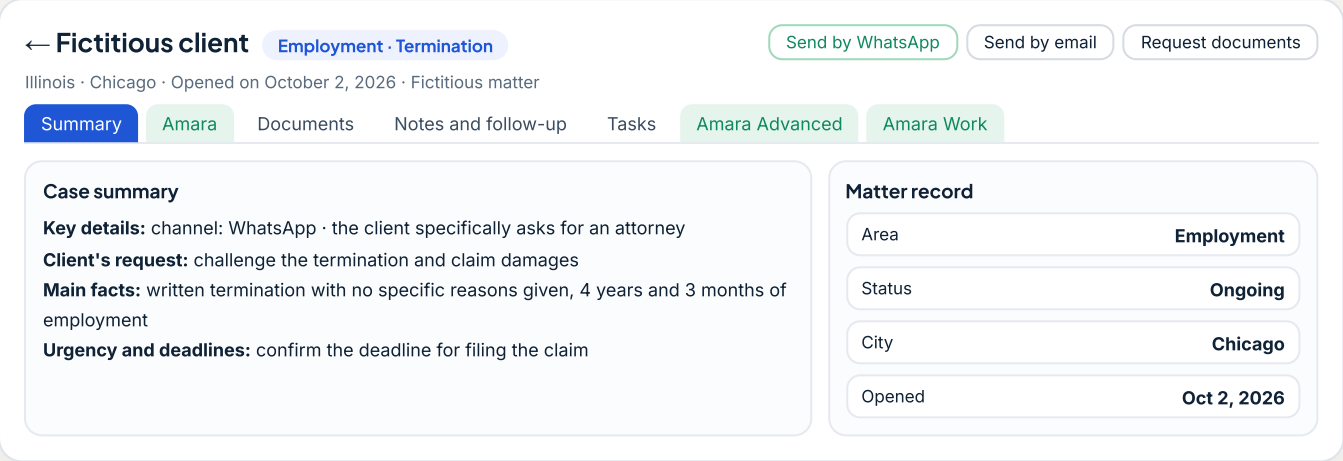
Report a security issue

seguridad@amaralegal.ai · amaralegal.ai/.well-known/security.txt

10

The firm's work, connected.

LexHub is the management environment where matters live: files, documents, clients, tasks and team. Amara works on top of all of it, so the AI always has the full context.



Illustrative recreation of a matter record in LexHub with fictitious data.

Matters on a board and a full record

Customizable statuses, timeline, activity history and an AI-written case summary.

Documents and library

Optical character recognition, reading of PDF, Word, Excel and images, data extraction and a central firm repository.

Tasks and next action

Each matter with its tasks and next step, with alerts for stalled matters.

Team, offices and org chart

Invitations, roles, multiple offices and matters shared between professionals or firms.

Notes and follow-up

Notes, follow-up and activity history kept on the same matter record.

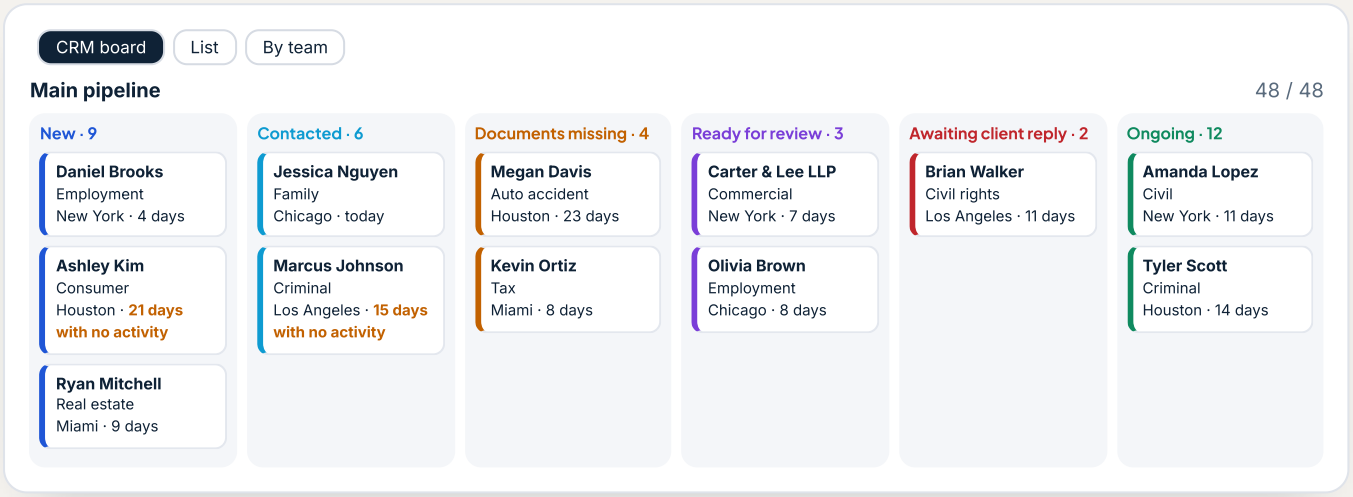
Permanent case memory

Decisions made on the matter are kept as memory for the next queries to Amara.

11

LexCRM.
Your firm's CRM.

Every inquiry, every matter and every client in one place, from intake to closing the matter. A CRM designed for attorneys, with Amara working on top: it reads the documents, summarizes the case and proposes the next step. $9.99/month + applicable taxes, with the first 3 months free.



Illustrative recreation of the CRM board with fictitious data. Pipeline stages are customizable and cards can be dragged between columns.

Visual pipeline and three views

Board, list and team view, with advanced filters.

Full record for every matter

Timeline, tasks, documents and client communication.

Stalled matter alerts

Each card shows the days with no activity and flags the urgent ones.

Client communication

Automatic WhatsApp in under a minute and a client portal by link.

Assessment of every inquiry

Each opportunity assessed so you know where to start.

Team, offices and shared matters

Roles, multiple offices and matters shared between firms.

12

The client is kept informed from the very first minute.

When the client's matter is opened, they receive a WhatsApp message from an official number in under a minute, confirming that their case is in an attorney's hands. If they reply or send documents, everything lands in the matter record.

01
The client arrives
Describes their situation by phone, website or WhatsApp.

02
The matter is created
Summarized, organized and ready to work on.

03
WhatsApp in under a minute
Automatic notice from the official number.

04
Everything in the matter
Replies and documents reach the attorney's record.

Link **Client portal.** Send the client a link and, from it, they upload their documents and view a portal with all the information on their case. Everything they upload reaches the matter.

WhatsApp tab in the matter
The conversation by day, downloadable attachments and an unread message counter.

Document generator
Demand letter, complaint and client letter, straight from the matter.

Dictation and transcription
The attorney dictates the task or transcribes recordings and receives a summary in the matter.

OCR and document reading
Scanned documents of up to 1,000 pages, PDF, Word, Excel, images and emails.

INTEGRATIONS

WhatsApp with an official number per matter · **Microsoft Word** to use Amara inside your documents · **Under study:** Court e-filing and PACER, to follow from Amara the cases and deadlines a firm manages in court e-filing systems.

13

A single provider for the whole legal career.

Amara supports legal professionals at every stage: in law school, when starting out in practice, as a solo attorney and as a firm with several offices.

STAGE 1

Law school

Law students work with a real tool, the same one attorneys use.

The law school's own portal with accounts for faculty and students

Simulated cases and real anonymized cases

Faculty follow each student's work

No cost in 2026-2027

STAGE 2

Law clerk and new attorney

AI, practice management software and a CRM from day one.

CRM and matters included

Special terms for newly admitted attorneys

Support when getting started

STAGE 3

Solo attorney

All legal work in one environment, without leaving it.

Amara, Advanced and Work

LexCRM, matters and WhatsApp

$69/month + applicable taxes ($49 the first month)

Amara Solo

STAGE 4

Large firm

Personalized AI for the whole group, by role.

Tailored environment by office, team and user

Management sees what each team is doing

Shared library and matters

Support during implementation

Amara Multi-office · contact us

From first year to large firm

The student who learns with Amara in law school keeps using it for bar exam preparation and in practice, and takes it along as their firm grows. The same environment and the same way of working, with more tools at each stage.

WHAT SETS AMARA APART

More productivity

Amara works on the matters: it does more than answer, it delivers complete work.

Easy to use

A simple environment, nothing to install and support from day one.

All in one environment

AI, matters, CRM and WhatsApp.

In English

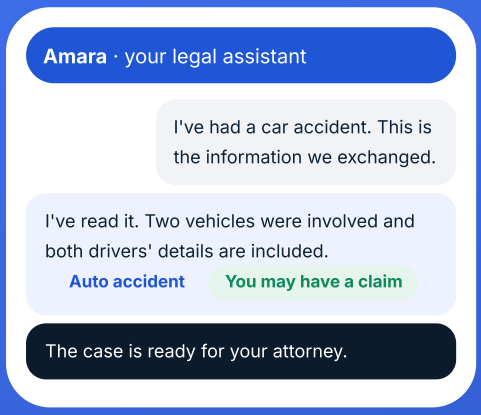
Drafting in English today; US legal corpus linked, coming soon.

Amara is no longer a chatbot.
It is your legal assistant in your pocket.

Android and iOS | **Phone and tablet**

Amara for you

For the public. Take a photo, explain what happened and Amara organizes the matter.



Amara for professionals

Phone and tablet. Your firm with you, even in the courtroom.

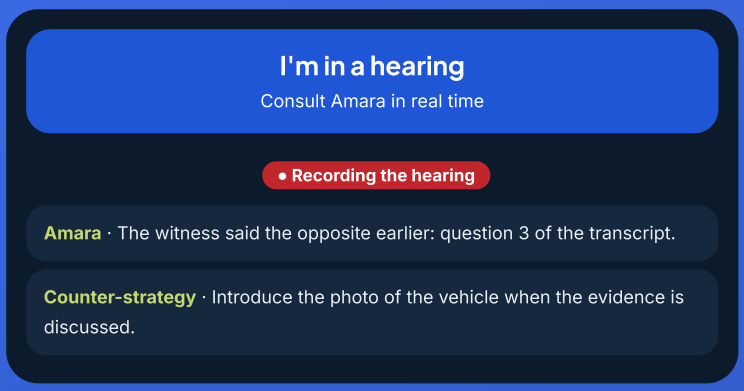


Photo
Statement, accident, document

Amara qualifies
Separates what matters from the rest

Case ready
Summarized and organized

Your attorney
The right one, recommended

Others stop at the conversation.
Amara closes the whole loop.

15

Proven work.
No experiments.

If your firm uses other tools, you need to know that Amara is not a gamble. There are firms using all of its features day to day, and the platform improves every day.

Illustrative recreation of the org chart of a firm with several offices, teams and roles. Fictitious data.

IN PRODUCTION

Firms working with Amara

Every feature in real use every day, on real matters for real firms in Spain.

CONTINUOUS IMPROVEMENT

We improve every day

New features and constant improvements, without the team having to stop work.

IMPLEMENTATION

Full support

We set up offices, teams and roles and migrate your matters into the environment.

CONTROL

Management sees what is happening

Org chart, roles and permissions by office, team and user.

SECURITY

Data in the EU today

US hosting in preparation. Your data does not train the AI. ISO/IEC 27001 in progress.

TECHNOLOGY

Frontier models only

Frontier models, even when they cost more. And we adapt to each release within days.

16

For one attorney. And for an entire network.

The same platform grows from a solo practitioner to an organization with several offices. And Amara can be configured as a dedicated environment, with each organization's brand, matters and workflows.

Offices and org chart

- Offices, heads and members per firm
- Network org chart
- Invitations and roles
- CRM by office, attorney and status
- Matters shared between firms

Custom areas

- Environments by type of case and practice area
- Area builder with a setup wizard
- Case intake linked to the portal
- Each area's own library and knowledge
- The organization's own AI environment

Shared knowledge

- Knowledge repository with review and approval
- Templates for pleadings and motions by type of case
- Each firm contributes whatever it chooses
- Pseudonymization or anonymization before sharing

Governance and control

- Data kept separate for each firm
- Access log for every matter
- AI usage control per firm
- Daily backups
- Subscriptions and prepaid AI balance per organization

A tool that grows with the firm: from the first matter to a network of firms.

Environments with several offices and areas are configured to order.

17

Your hyper-specialized assistant. Amara, specialized in what you need.

When an attorney needs a specialized assistant, Amara is configured for that practice area. Tell us what you need and we will turn Amara into your hyper-specialized assistant.

Tailored instructions and working environments

We create the instructions and custom working environments so that the attorney has the assistant they want, in the practice area they need: employment, family, business, criminal, real estate or whatever your firm requires.

SOME AGENTS YOU CAN ASK FOR

Intake agent
Classifies incoming inquiries, identifies urgency and prepares a first reply.

Matter agent
Summarizes the case and identifies missing documents, milestones, risks and next steps.

Document agent
Reviews contracts, pleadings, demand letters, deeds and client documents.

Deadlines agent
Keeps track of deadlines, tasks, owners and the week's priorities.

Client agent
Prepares clear updates for the client on the status of their case.

Practice area agent
Adapted to employment, business, family, criminal, immigration, banking, administrative law and more.

Management agent
An overall view of workload, open matters, bottlenecks and opportunities.

Legal marketing agent
Turns frequently asked questions and legal updates into content for the website and the newsletter.

HOW IT WORKS

01
Tell us the process
The problem or task you want to solve.

02
We analyze
Data, permissions, documents and tools.

03
We design
The agent and its limits.

04
We test
With real or simulated cases.

05
We fine-tune
Before building it into the firm's workflow.

Getting started is easy. And we are with you.

You do not need technical knowledge or weeks of setup. We help you prepare the environment for work: your firm, your team and your matters.

- **1. Sign-up**
  We create your account and verify your professional status.
- **2. We set up your firm**
  Firm details, offices, team, invitations and your practice areas.
- **3. We migrate your work**
  We upload your first matters and documents and create matters directly from a pleading or a document.
- **4. First matter with Amara**
  Together we try Amara, Advanced and Work on a real matter and define the right custom agent for you.

WHAT WE DO

Set up the environment, answer your questions, prepare your templates and agents and support you on your first matters.

WHAT YOU DO

Tell us how you work and try it on a real matter, with a 30-day trial by signing up with your email.

COMING SOON IN THE US

COMING SOON

US legal corpus

U.S. Code, eCFR, Federal Register, federal and state opinions; federal law first, then state law state by state.

COMING SOON

US bar exam questions

Amara's result on US bar exam questions, with the full methodology published.

COMING SOON

US data hosting

Hosting of data in the US for US firms. Today, data is stored in the EU, encrypted, with a data processing agreement.

Try it for 30 days or become a founding firm
